

Technical Data

TECHNICAL DATA

Flow rate maximum: from 3 GPM to 18 GPM

Head up to: 538ft

Maximum immersion depth: 490 ft

Type of pumped liquid: clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral.

Liquid temperature range: min 0°C/32°F - max 40°C/104°F

Delivery: 1" 1/4 NPT

Impeller/s material: technopolymer

Maximum number of starts: 20/h

Protection class: IP 68

Motor insulation class: F

Power cable (m) and plug: 5ft/1.5m

Single phase power input: 230V(±6%) 60 Hz

Three phase power input: not available

Possible type of installation: in vertical position.

If it is installed in horizontal position it is necessary to ensure a minimum load on the thrust unit and the cooling sleeve.

Certification: CSA, NSF

APPLICATIONS

3" submersible multi-impeller pump for 3" or larger wells for pressurization, lifting water from underground, gardening and irrigation activities in residential building service.

Ready-to-use pump.

CONSTRUCTION FEATURES OF THE PUMP

Technopolymer impellers housed with stainless steel adjustment rings. Pump liner, shaft, coupling with motor, integrated suction filter and cable guard are in stainless steel. Suction and delivery supports in micro-cast AISI 304 stainless steel. Removable built-in non-return valve in technopolymer. Technopolymer impellers. NSF61 certificate is pending approval.

CONSTRUCTION FEATURES OF THE MOTOR

Two-pole asynchronous motor completely made of AISI 304 stainless steel. Two wire version. The thrust block and bushes are cooled and lubricated with a mixture of water and glycol. Rotor mounted on a Kingsbury type self-centering thrust block capable of withstanding high axial loads.

The stator is immersed in thermosetting insulating resin with high heat dissipation capacity and encapsulated in an airtight AISI 304 stainless steel casing.

Removable cable connector CSA approved.
