DAB

FX RANGE

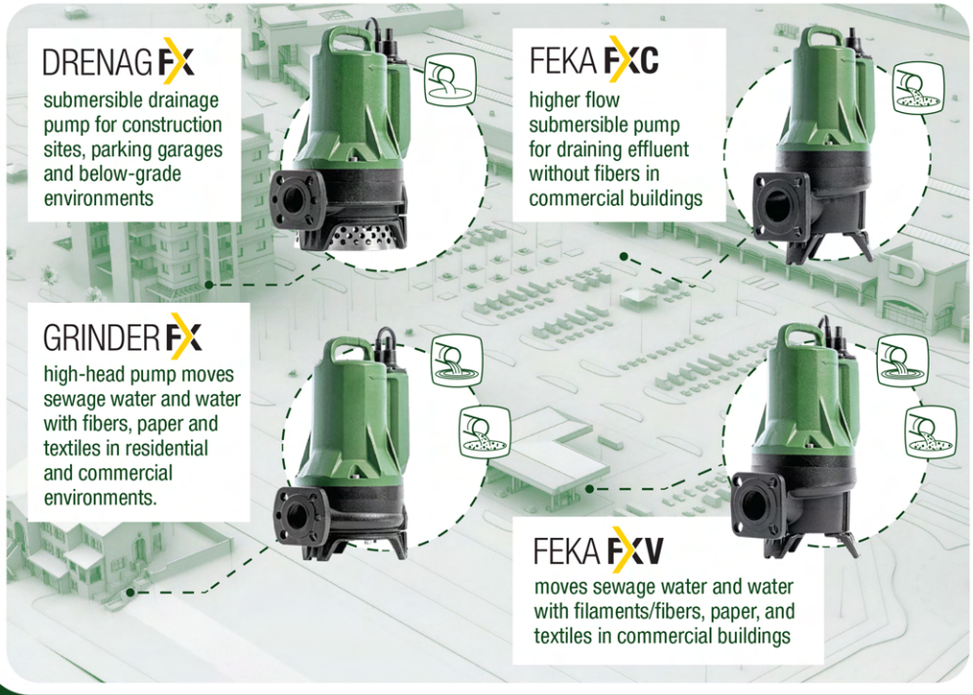
ABSOLUTE RELIABILITY AND DURABILITY

NEW RANGE

FOUR HYDRAULIC PUMPS FOR LIFTING AND TRANSFER OF RESIDENTIAL, COMMERCIAL AND INDUSTRIAL WASTEWATER

The FX range is built with energy-efficient motors that permit lower power ratings, delivering the same high performance as a more powerful pump. Advanced research into Computational Fluid Dynamic Analysis (CFD) enables DAB to improve performance and increase capacity to manage sewage water efficiently.

APPLICATIONS



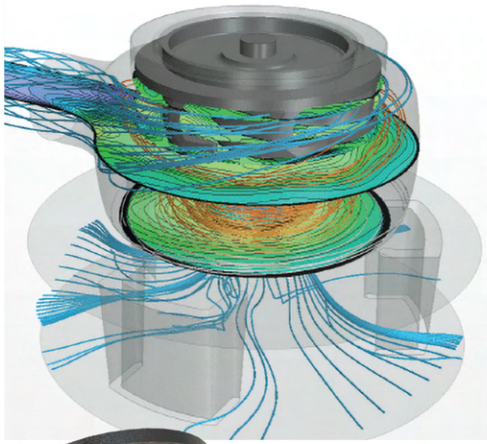
DRENAG FX
submersible drainage pump for construction sites, parking garages and below-grade environments

FEKA FXC
higher flow submersible pump for draining effluent without fibers in commercial buildings

GRINDER FX
high-head pump moves sewage water and water with fibers, paper and textiles in residential and commercial environments.

FEKA FXV
moves sewage water and water with filaments/fibers, paper, and textiles in commercial buildings

HIGH EFFICIENCY, DOUBLE THE SAVINGS*



The new DAB patented Super Vortex impeller is redesigned to enhance performance of the FEKA FXV pumps under all conditions, reducing power consumption with free passage the same size as the pump's delivery port (2" and 2.5" / 50 and 64 mm).

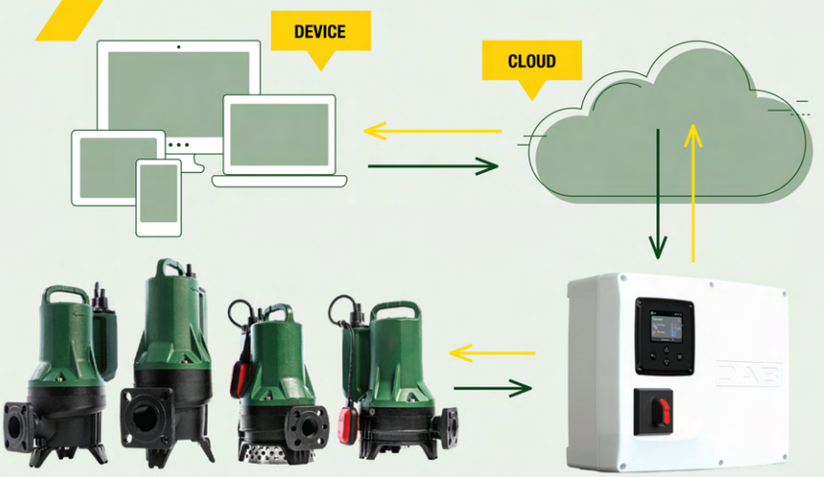
DABPUMPS.US/EN/FX

*compared to a traditional hydraulic pump in terms of medium usage conditions.

FX RANGE

D+ CONNECT ready

ALWAYS IN CONTACT WITH YOUR SYSTEMS



NgPanel accessory is an electronic pump control unit for filling and emptying operations, designed to monitor water levels in tanks or wells in real time.

ngPANEL

BUILT-IN CONNECTIVITY

DAB digital services allow you to remotely control your installations, in real time and wherever you are. With the owner's permission, connectivity in the cloud allows you to monitor activity of the FX pumps and receive updates on operation and alarms in order to anticipate the risk of malfunctions and seizing.

D-CONNECT installer benefits – remote access, proactive monitoring, peace of mind for your customer.

D-CONNECT customer benefits – energy savings and lower bills.

QUICK AND SIMPLE **MAINTENANCE**

The pumps in the FX range have a three level structure for quick access to all the main components, greatly facilitating maintenance. The spare parts have also been unified and made universal for the entire range.

COMPACT **MOTORS**

The new, compact motors are designed to increase the starting torque and reduce the risk of clogging. More efficient than ever, they allow the FX pumps to run even when not fully submerged to permit complete emptying of the tanks.
