

SIMPLY RELIABLE

**DAB**

**FX** RANGE

**ABSOLUTE RELIABILITY  
AND DURABILITY**

## FOUR HYDRAULIC PUMPS FOR LIFTING AND TRANSFER OF RESIDENTIAL, COMMERCIAL AND INDUSTRIAL WASTEWATER

**NEW RANGE**

The FX range is built with energy-efficient motors that permit lower power ratings, delivering the same high performance as a more powerful pump. Advanced research into Computational Fluid Dynamic Analysis (CFD) enables DAB to improve performance and increase capacity to manage sewage water efficiently.

### APPLICATIONS

#### DRENAG **FX**

submersible drainage pump for construction sites, parking garages and below-grade environments

#### FEKA **FXC**

higher flow submersible pump for draining effluent without fibers in commercial buildings

#### GRINDER **FX**

high-head pump moves sewage water and water with fibers, paper and textiles in residential and commercial environments.

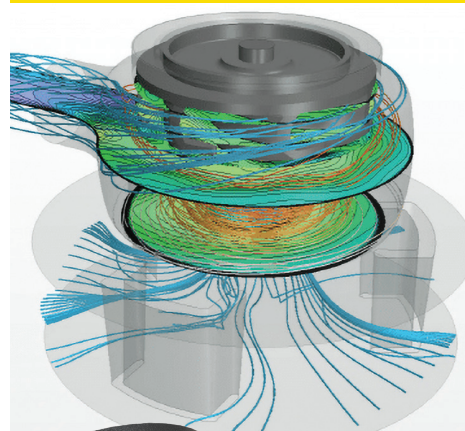

#### FEKA **FXV**

moves sewage water and water with filaments/fibers, paper, and textiles in commercial buildings

**HIGH EFFICIENCY,  
DOUBLE THE  
SAVINGS\***

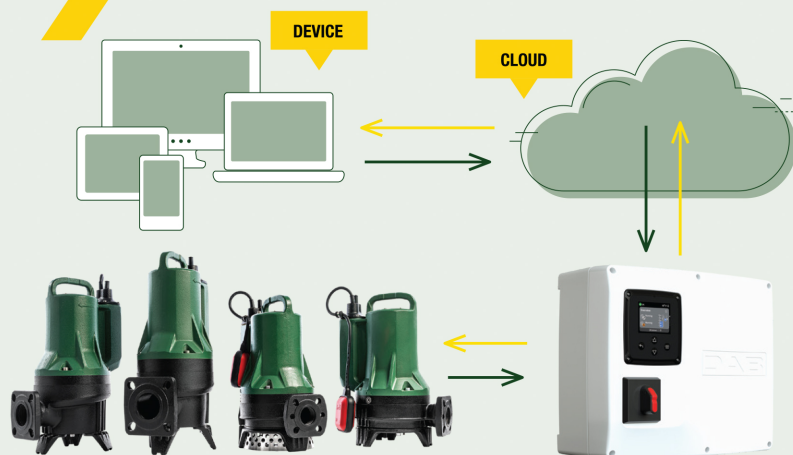

The new DAB patented Super Vortex impeller is redesigned to enhance performance of the FEKA FXV pumps under all conditions, reducing power consumption with free passage the same size as the pump's delivery port (2" and 2.5" / 50 and 64 mm).

# FX RANGE

ready  
**D-CONNECT**

**ALWAYS IN CONTACT  
WITH YOUR SYSTEMS**

**NgPanel accessory** is an electronic pump control unit for filling and emptying operations, designed to monitor water levels in tanks or wells in real time.

**ngpanel**

## BUILT-IN CONNECTIVITY

DAB digital services allow you to remotely control your installations, in real time and wherever you are. With the owner's permission, connectivity in the cloud allows you to monitor activity of the FX pumps and receive updates on operation and alarms in order to anticipate the risk of malfunctions and seizing.

**D-CONNECT installer benefits** – remote access, proactive monitoring, peace of mind for your customer.

**D-CONNECT customer benefits** – energy savings and lower bills.

## QUICK AND SIMPLE MAINTENANCE

The pumps in the FX range have a three level structure for quick access to all the main components, greatly facilitating maintenance. The spare parts have also been unified and made universal for the entire range.

## COMPACT MOTORS

The new, compact motors are designed to increase the starting torque and reduce the risk of clogging. More efficient than ever, they allow the FX pumps to run even when not fully submerged to permit complete emptying of the tanks.
