DAB 6GF HEAVY DUTY 6-IN. SUBMERSIBLE MOTORS

GF6 TESLA™* 6-in. asynchronous two-pole submersible motors have rugged thrust bearings designed for heavy axial loads. Suitable for use with variable frequency drive (30 Hz-50/60 Hz).

APPLICATIONS

DAB 6GF and 6GF Heavy Duty 6-in. Submersible Motors are designed for deep borehole applications such as:

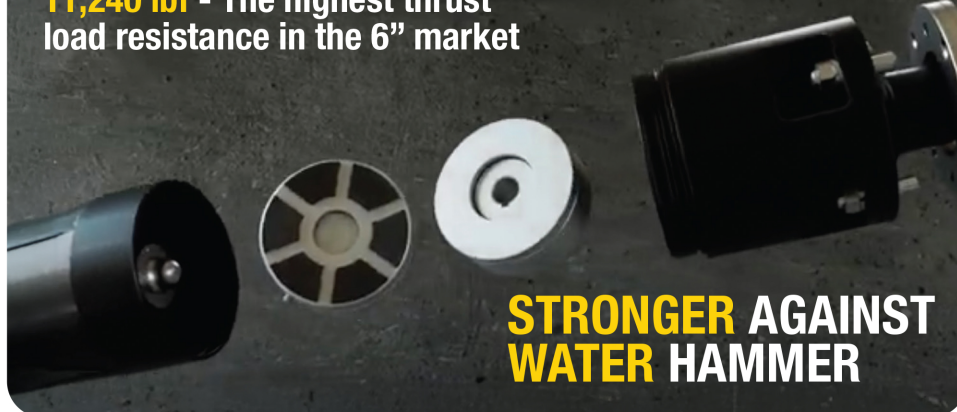

- Domestic and industrial water supplies
- Aqueducts
- Fire-fighting systems
- Pressurizing water systems
- Irrigation and community well systems
- Farming and agriculture
- Other industrial applications

NEW 6GF Heavy Duty Submersible Motors

11,240 lbf - The highest thrust load resistance in the 6" market

The range of TESLA motors, manufactured in Italy with ISO 9001 certified processes, provides a solution for every kind of application, from small domestic irrigation to the most important industrial applications and water supply.

CERTIFICATIONS

All the motors in the GF6 range can be used to drive submersible pumps in the conditions established in CSA Standard C22.2 No. 100-14 (Motors and Generators) UL Standard 1004-1 (Electric Motors), and at the supply voltage / frequency specified on the rating plate.
