

SIMPLY RELIABLE

esybox WATER BOOSTING, SIMPLIFIED.

ESYBOX INTEGRATED WATER PRESSURE BOOSTER PUMP

The Value of Efficiency - ESYBOX is the original fully integrated, self-contained electronic water boosting system. The ESYBOX is a self-priming, multi-stage water boosting pump incorporating an electronic inverter, pressure and flow sensors, an adjustable high-resolution LCD display, and an integrated 0.5 gallon expansion tank.

Combining all of the components of a traditional water boosting system into a single unit, the ESYBOX is compact and fully integrated to save space and money. Use for potable water, or domestic and commercial water boosting, gardening, and irrigation applications.

APPLICATIONS:

ESYBOX inverter system provides the comfort of constant water pressure, while saving energy too. Use for potable water, or domestic and commercial water boosting, gardening, and irrigation applications.

Designed for indoor use. Protection required for outdoor use.
Installing a pressure tank is recommended due to application difference(s).
Get recommended GPM from Product News on DAB's Official Website.

*compared to a traditional booster set in terms of medium usage conditions.

BUILT-IN CONNECTIVITY WITH H2D

EsyBox is compatible with DAB's H2D cloud service, giving you remote access to monitor and manage the pump anytime, from anywhere. View system status, adjust settings, and respond to issues faster—all from your phone or desktop.

H2D FREE FEATURES

- Check performance anytime
- Ensure optimal water pressure and flow
- Access comfort features like Power Shower and smarter usage timing

H2D PREMIUM FEATURES

- Remote configuration and control
- Real-time alerts for faster issue resolution
- Added confidence and convenience—fewer site visits, happier customers

BUILT-IN
CONNECTIVITY

SPACE SAVING & EASE OF INSTALLATION

The ESYBOX can be installed either vertically or horizontally, even in enclosed or recessed spaces with low levels of air exchange. The water-cooled motor, protective sound dampening ABS enclosure, anti-vibration feet, and advanced electronics all make the original ESYBOX very quiet—as low as 45 dB under typical use.

The Esybox can be grouped with up to four pumps to create a booster set, and pumps can be added after the initial installation, enabling expansion and protecting your investment.

ESYBOX TWIN

is a compact system with one ESYTWIN docking system and two ESYBOX units with integrated variable speed drives.
