

SAFE AND EASY: ADVANCED WATER PUMPS FOR EFFECTIVE FIREFIGHTING

OUR SOLUTION

The ESYBOX Max is a booster pump solution for large homes, apartment buildings, hotels, light industrial applications, hospitals, golf courses, and other applications where high pressure or high flow is needed. The OSA (on site assembly) feature allows for easy access to the installation area. This enables you to assemble your booster on-site following our quick assembly steps.

SPACE SAVING AND EASE OF INSTALLATION **50 GPM at 50 PSI**

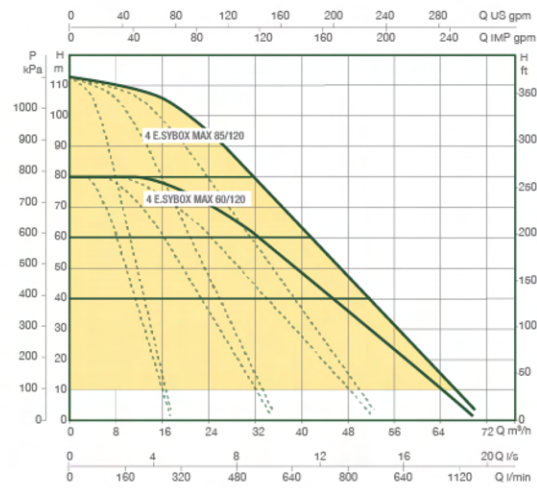

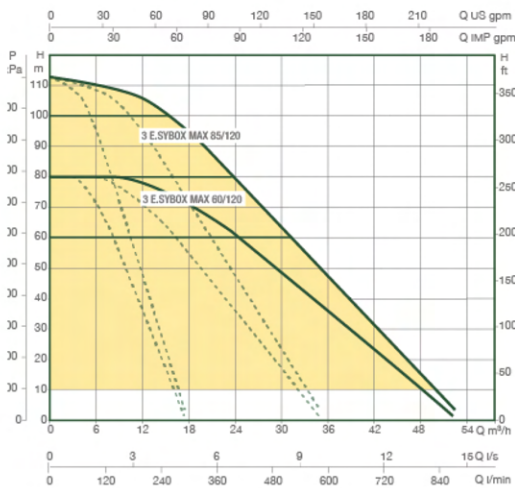

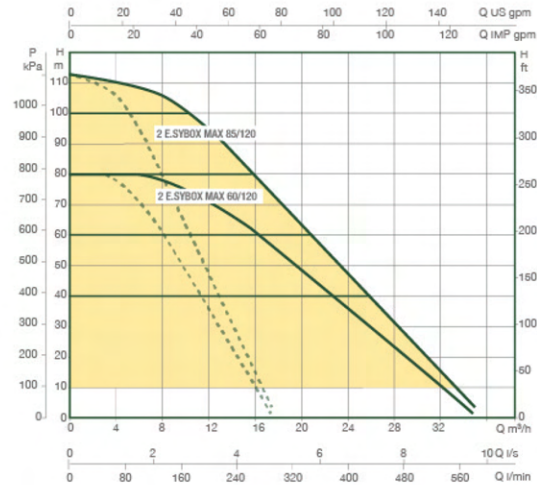

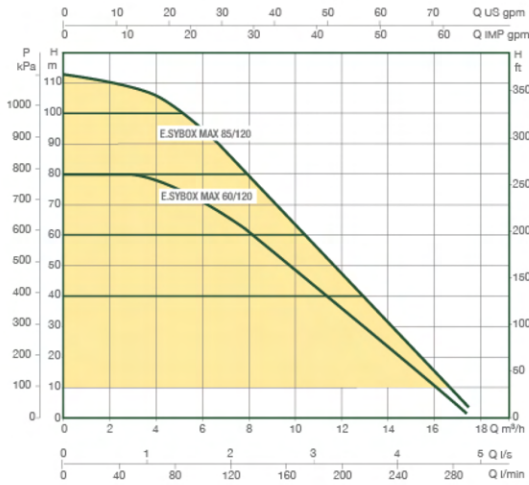

The modularity of the ESYBOX Max and ESYDOCK Max system provides an easy way to install the booster pumps that you need, or to expand in the future as your demand increases. The OSA system makes this a quick, simple, and easy process.

ESY I/O

The electric expansion module allows Esybox Max to interface with the external input/output devices (eg: float switch, pressure switch, remote alarm) and with the BMS world (Building Management System).
