# CORE - STOCK PRODUCTS

The ESYBOX MINI 3 is a compact automatic pressurization system designed by DAB for supplying water to a single residence. It ensures a steady water pressure inside the house, and it can be adjusted to your desired pressure between 15 and 80 pounds per square inch (psi).

This system uses advanced VFD technology that helps save energy. You can use it with drinking water and all your household needs, it can even be used for gardening.

The best part is that you don't need any extra parts to install it. It includes a powerful pump, smart electronics, pressure and flow sensors, a clear LCD display, a built-in expansion tank, and a check valve. You can install it vertically or horizontally and its compact size makes it suitable for tight spaces where air circulation may be limited.

In summary, the ESYBOX MINI 3 offers a convenient and efficient solution for maintaining water pressure in a single residence. It ensures comfort, energy savings, while still being easy to install.

**Operating range**  
capacity up to 21.1 GPM; head up to 180 ft

**Liquid quality requirements** clean, free from solid or abrasive contaminants, non-viscous, non-aggressive, uncrystallised and chemically neutral.

**Liquid temperature range** from 32°F to +104°F

**Maximum suction depth** 26 ft

**Maximum ambient temperature** +122°F

**Maximum operating pressure** 109 psi

**Insulation class** F

**Installation** horizontal or vertical fixed position

**Special versions on request**  
alternative types of electrical plug

**Certification**

Approved to NSF61, 372, UL and CSA standards

## esybox mini<sup>3</sup>

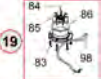

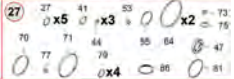

### TECHNICAL DATA

\* By replacing the existing NEMA5-15P plug with a NEMA6-15P plug the pump can operate at 1x208-240 V

**esybox**

ESYBOX is a comprehensive pressurization system developed by DAB for use in homes and residential settings. The great thing about ESYBOX is that it doesn't require any additional components during installation. It combines several key components, including a multistage self-priming pump with electronic inverter control, flow and pressure sensors, a high-resolution LCD display, and an integrated 0.5-gallon expansion tank.

One of the advantages of ESYBOX is its flexibility in installation. It can be mounted both vertically or horizontally, making it suitable for various spaces, even those with limited air circulation.

The system features a water-cooled motor, protective, sound absorbing ABS hull protection, vibration damping feet, and advanced electronics. These advanced features contribute to its quiet operation, producing only 43 decibels of noise. Additionally, ESYBOX offers wireless capabilities, enabling easy creation of multi-pump pressurization units and seamless connectivity with other DAB devices.

In summary, ESYBOX is a reliable and compact pressurization system designed for domestic and residential applications. It simplifies installation by eliminating the need for additional components and offers various features for optimal performance, including quiet operation and wireless connectivity options.

**Operating range**  
capacity up to 31.7 GPM; head up to 213 ft

**Pumped liquid** clean, free from solids or abrasive, non-aggressive, non-viscous, crystallized and not chemically neutral.

**Maximum liquid temperature** 104°F

**Maximum ambient temperature** 122°F

**Maximum suction depth**  
self priming up to 26 ft

**Maximum working pressure** 116 psi

**Degree of protection** IP X 4

**Insulation class** F

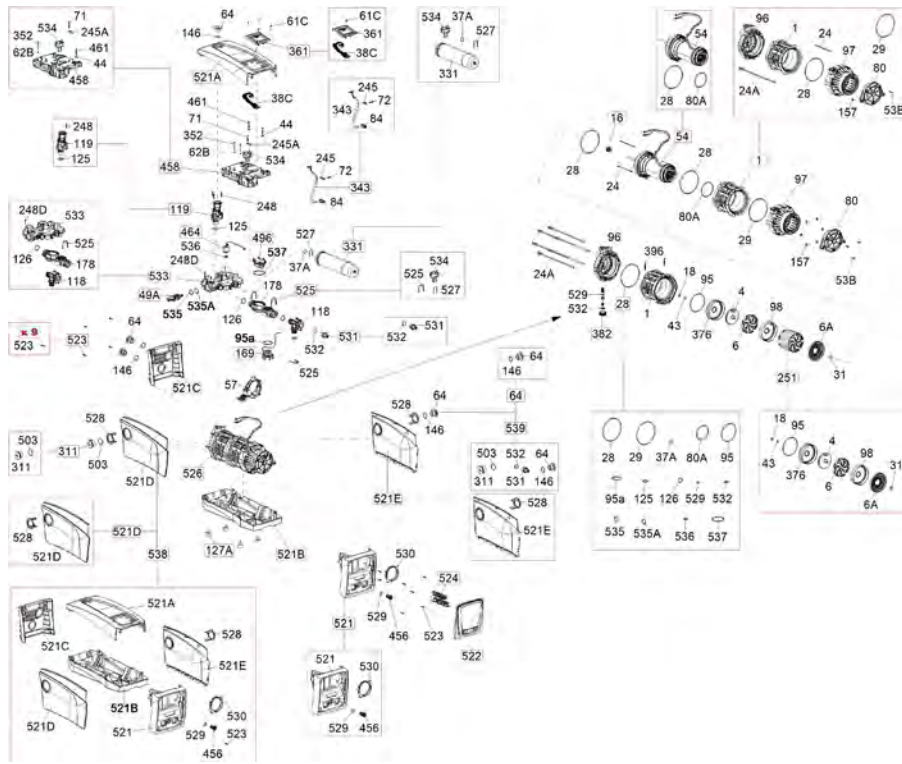

**Certification**

Approved to NSF61, 372, UL and CSA standards

# CORE - STOCK PRODUCTS

The ESYBOX Max is an all-in-one pumping system designed for water pressurization in commercial buildings. It comes in two different power sizes, and you can customize the configuration based on your needs. Whether you need a single, double, triple, or quadruple unit, this system can handle it. It's perfect for medium to large condominiums and even tall buildings with up to 14 floors.

Each unit uses the ESYDOCK Max docking station to connect the pumping unit to the piping system.

The pumping unit itself contains an electronic vertical pump with multiple impellers, a display, a Wi-Fi module, pressure sensors, a non-return valve on the delivery side, and an integrated expansion tank. What's really cool is that you can assemble the unit right at the installation site, thanks to the innovative docking station and wireless communication between the pumps. One person can handle the assembly easily.

The system uses a variable frequency drive, which adjusts the motor's speed to maintain a constant pressure. Plus, it has a water-cooled permanent magnet motor, which means it's more efficient and can save energy. The large display makes it easy to configure the system's settings, and you can even view them from your smartphone using the DConnect app or access them remotely through the DConnect service.

If you need to interface the ESYBOX max with a BMS (Building Management System), there's an expansion module available called esy I/O that you can use as an accessory.

**Flow rate** up to 76.6 GPM (single pump unit)

**Head** 371 ft

**Type of pumped liquid** clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral

**Maximum liquid temperature** +122°F

**Maximum room temperature** +131°F

**Maximum inlet pressure** 73 psi

**Nominal pressure (PN)** 174 psi

**Constant pressure range**  
15-174 psi (44 psi by default)

**Motor protection class** IP X5

**Motor insulation class** F

**Impeller material** technopolymer

**Single phase power input** 208-240 V 50/60 Hz

**Three phase power input** 380-480 V 50/60 Hz

**Type of installation** fixed in vertical position

**Certification**

Approved to NSF61, 372, UL and CSA standards

# CORE - STOCK PRODUCTS

The esybox diver is a powerful 7-inch pump that uses advanced electronics and a variable frequency drive to provide clean water from wells, tanks, or cisterns to your home.

You can use the pump in different ways - it can be submerged, partially submerged, or even used on the surface when paired with the DOC68 accessory (sold separately).

This pump is perfect for pressurization, rainwater re-use, gardening, and irrigation in residential buildings. It has a built-in variable frequency drive that adjusts its operation based on the system's needs. It also features a non-return valve and a stainless steel handle for easy transport.

The electronic system protects against dry running, and the variable frequency drive helps save energy. You can adjust the suction height up to 3.1 inches from the bottom. Plus, you can connect a float or a level sensor without opening the pump, thanks to the NFC (Near Field Communication) pocket that maintains a watertight seal.

The pump includes an expansion tank. With the included DConnect Box 2's built in WiFi and the DConnect app for Android or iOS, you can control the pump directly from your smartphone.

The whole pump is IP 68 certified, meaning it's protected against dust and can be used on the surface with flooded suction.

**Flow rate maximum** 31.7 GPM

**Head up to** 180 ft

**Maximum immersion depth**

39 ft standard version

**Type of pumped liquid** clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral.

**Free passage** 0.1 in

**Liquid temperature range from**

+32°F to +122°F

**Set cut-in** 35 psi (+-3)

**Outlet connection** thread 1" 1/4

**Pump maximum diameter** 7.3 in

**Protection class** IP 68

**Motor insulation class** F

**Power cable and plug** 49 ft

**Possible type of installation** fixed, horizontal or vertical. Submerged or semi-submerged. It can be installed on the surface, under the water level, or outside in a vertical position with the DOC68 accessory (supplied separately).

**Certification**

Approved to NSF61, 372, UL and CSA standards

## DTRON 2

The DTRON 2 is a powerful submersible pump that's perfect for various water applications. It's designed to be used in water wells, tanks, or cisterns, and it's ideal for residential buildings. With its 7" size, it can efficiently pressurize water, collect rainwater for reuse, and support gardening and irrigation needs.

The pump comes with convenient features that make it user-friendly and reliable. The integrated pressure switch and flow switch, along with the electronic board, ensure automatic operation, allowing the pump to turn on and off as needed. It also has dry running protection to prevent damage.

Transporting and installing the pump is a breeze, thanks to its double mechanical seal, non-return valve, and handle. These features make it easy to move around and set up. Plus, the innovative modular design allows for separate disassembly of the hydraulic part, motor, electrical part, and filter, making maintenance activities simple.

To accommodate different water levels, the suction height of the pump can be adjusted up to 3.1 inches using the included accessory. Additionally, the pump is equipped with NFC (Near Field Communication) pocket, which allows you to connect a float without compromising the watertight seal of the pump.

The integrated expansion tank provides water hammer protection, eliminating the need for an additional expansion tank. The cable also has a quick coupling for easy installation inside the tank or cistern.

If you need to use it as a surface pump with flooded suction, you can do so by using the separately supplied accessory called DOC68

**Maximum immersion depth** 39 ft

**Type of pumped liquid** clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral.

## DTRON 3

The DTRON 3 is an advanced 7" electronic submersible pump with multiple impellers. It's specifically designed for clean water applications and can be used in wells, cisterns, or tanks. The versatility of this pump allows it to be used submerged, partially submerged, or even on the surface when paired with the DOC68 accessory.

This pump is perfect for residential buildings as it offers various services. It can efficiently pressurize water, facilitate the reuse of rainwater, and support gardening and irrigation activities.

With its built-in pressure sensor and flow meter integrated into the electronic board, the pump operates automatically. It can turn on and off as needed and has dry running protection to prevent damage. The inclusion of a double mechanical seal, non-return valve, and handle makes transporting and installing the pump a breeze.

Adjusting the suction height is a simple task, thanks to the special accessory provided as standard. It allows you to adjust the suction height from the bottom up to 3.1 inches. Additionally, the NFC (Near Field Communication) pocket enables you to connect a float without compromising the watertight seal of the pump. The starting pressure is adjustable through the Com Box, supplied as standard.

To protect against water hammer, the pump comes with an integrated expansion tank. The cable is equipped with a quick coupling, making installation inside the tank or cistern easier.

If you need to use it as a surface pump with flooded suction, you can do so by using the separately supplied DOC68 accessory.

**Maximum immersion depth** 39 ft

# CORE - STOCK PRODUCTS

JET 150-200 PS

# JET

The JET is a self-priming centrifugal pump that can efficiently lift water, even when there's air bubbles present, down to a maximum depth of 29ft. It's specifically designed for water supply in homes, gardening, and any other situation where you need that self-priming functionality.

The JET comes with a durable cast iron pump body and motor support, along with a technopolymer impeller, diffuser, Venturi tube, and sand guard. It's built tough. Plus, it includes stainless steel adjustment rings for added stability. To ensure reliable operation, the pump is equipped with a carbon/ceramic mechanical seal.

The JET features an asynchronous motor that's enclosed and cooled by external ventilation. It's got built-in thermal and current overload protection, and in the single-phase version, the capacitor stays on permanently.

On top of all that, the JET comes with a pressure switch, making it a self-priming pump that kicks into action based on your desired pressure settings.

### Operating range

from 1.8 to 46.2 GPM with head up to 203 ft

**Liquid quality requirements** clean, free from solid or abrasive contaminants, non-viscous, non-aggressive, uncrystallised and chemically neutral, close to the properties of water.

**Liquid temperature range** from 32°F to +104°F

**Maximum ambient temperature** +104°F

**Maximum operating pressure** 116 psi

**Installation** fixed in a horizontal position.

### Special executions on request

different frequencies and/or voltage.

**Motor protection rating** IP 44

**Terminal block protection rating** IP 55

**Insulation class** F

## EUROINOX

### MULTISTAGE CENTRIFUGAL PUMPS

Multistage horizontal centrifugal pump, featuring extremely silent running suitable for domestic use for water supply and pressurisation, irrigation of gardens and vegetable gardens, and moving water in general.

**Euroinox:** stainless steel pump body.

Motor support in die-cast aluminium, seal holder in AISI 304 steel. Mechanical seal in carbon/ceramic. Rotor shaft in AISI 304 steel. Rotors, diffuser bodies and diffusers in technopolymer. Adjustment rings in stainless steel.

**Protection level of motor** IP 44

**Protection level of terminal board** IP 55

**Insulation class** F

**Operating range** from 2.6 to 31.7 GPM with a head of up to 236 ft

**Pumped liquid characteristics** clean, free from solid or abrasive substances, non viscous, non aggressive, non crystallised, chemically neutral and close to the characteristics of water

**Liquid temperature range**

from 32°F to +95°F for domestic use (EN 60335-2-41)

from 32°F to +104°F for other uses

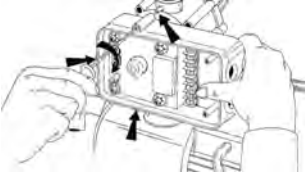

**Maximum ambient temperature** +104°F

**Maximum operating pressure** 116 psi

**Euroinox** self-priming

Is equipped with automatic restart in case of failure and anti-jamming function. No need for an expansion tank, check valve, filter or fittings. Can be installed on surface and submersible pumps up to 16 amps.</p>	<b>MCDV114PR 1 1/4" 35-100 PSI</b>	109640360

# MTO - SEASONAL PRODUCTS

Self-priming centrifugal pump with excellent suction capacity even when there are air bubbles. Particularly suitable for water supply in domestic installations, small-scale agriculture, gardening and wherever self-priming operation is necessary.

**Jetcom:** technopolymer pump body.

Motor support in cast iron, technopolymer impeller, diffuser, Venturi tube and sand guard. Stainless steel adjustment rings.

Carbon/ceramic mechanical seal. Asynchronous motor closed and cooled by external ventilation.

Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

**Operating range** from 1.8 to 23.3 GPM with head up to 173 ft

**Liquid temperature range** from 32°F to +104°F for other use

**Pumped liquid characteristics** clean, free from solids or abrasive substances, non-viscous, non-aggressive, non-crystallised and chemically neutral.

**Maximum ambient temperature** +104°F

**Maximum working pressure** 87 psi

**Protection level** IP 44 (IP 55 terminal board protection)

**Insulation class** F

# S3

Introducing the S3, a remarkable 3-inch Submersible Multi-Impeller Pump! This pump is all set to go, providing the perfect solution for pressurization, water lifting, gardening, and irrigation in residential buildings. Designed specifically for 3-inch or larger wells, it guarantees powerful performance and unwavering reliability. Say farewell to water supply problems with this compact and highly efficient pump. Invest in the 3-inch Submersible Multi-Impeller Pump today and effortlessly take charge of your water supply!

**Here are some notable construction features of the pump:**

- Technopolymer impellers housed with stainless steel adjustment rings
- Pump liner, shaft, coupling with motor, integrated suction filter, and cable guard made of stainless steel
- Suction and delivery supports in micro-cast AISI 304 stainless steel
- Removable built-in non-return valve in technopolymer
- Technopolymer impellers
- NSF61 approved

**Let's not forget about the motor construction features:**

- Two-pole asynchronous motor entirely made of AISI 304 stainless steel
- Two-wire version
- Thrust block and bushes cooled and lubricated with a water and glycol mixture
- Rotor mounted on a Kingsbury type self-centering thrust block capable of withstanding high axial loads
- Stator immersed in thermosetting insulating resin with excellent heat dissipation capacity
- Encapsulated in an airtight AISI 304 stainless steel casing
- Removable cable connector CSA approved
- Motor suitable for use with variable frequency drive (30 Hz - 60 Hz)

Experience the durability, reliability, and cutting-edge features of the S3.

**Flow rate** from 3 to 18 GPM

**Head up to** 538 ft

**Maximum immersion depth** 490 ft

**Type of pumped liquid** clean, free of solids and abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral.

**Liquid temperature** from +32°F to +104°F

**Output connection** 1" 1/4 NPT

**Impeller/s material** technopolymer

**Maximum number of starts** IP 68

**Protection class** 20/h

**Motor insulation class** F

**Power cable** 5 ft

**Single phase power input**

1x230 V 60 Hz

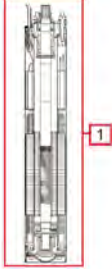

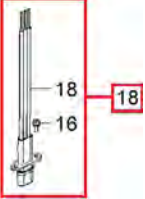

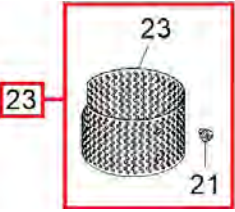

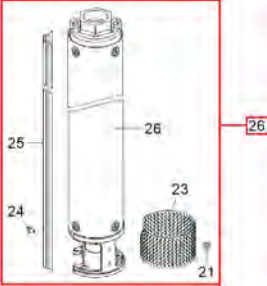

**Possible type of installation** fixed in vertical position. Horizontal installation is possible, it is recommended to install a cooling sleeve

**Certification** pump end NSF61 motor: CSA approved

# S4

Introducing our incredible 4" multi-impeller borehole pumps, designed specifically for clean water applications. These pumps are engineered to boost water pressure, cater to gardening and irrigation needs, and lift water from boreholes in residential and commercial buildings. They are also well-suited for agricultural irrigation systems.

To ensure optimal performance, the S4 pumps must be installed in wells with a minimum diameter of 4". Alternatively, they can be installed in tanks or cisterns. These pumps effectively increase water pressure, making them perfect for watering medium to large gardens or, in the case of models with higher flow and head capabilities, for agricultural irrigation systems.

We offer these pumps in different configurations to meet your specific needs.

**You have the following options to choose from:**

- 1. Pump End Only:** This option includes the pump without the motor. It provides flexibility, allowing you to select the motor that best suits your requirements.
- 2. Pump end with water-filled motor 2WIRE:** This configuration includes the pump along with a water-filled motor that operates on a two-wire system. It simplifies installation and ensures efficient performance.
- 3. Pump end with water-filled motor 3WIRE:** With this option, you receive the pump along with a water-filled motor that operates on a three-wire system. This configuration offers enhanced control and versatility.

**Flow rate** up to 120 GPM

**Head up to** 1500 ft

**Maximum immersion depth** 4GG - 4TW: 984 ft

**Type of pumped liquid** clean, free of solids and abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral

**Sand quantity** 5.42 lb/in<sup>3</sup>

**Liquid temperature** from +32°F to +104°F

**Output connection** S4 5-25: 1" 1/4 NPT

S4 35-90: 2" NPT

**Pump maximum diameter** 3.9 in

**Impeller/s material** technopolymer

**Maximum number of starts** IP 68

**Protection class** 20/h

**Motor insulation class** F

**Single phase power input** 1x115 or 1x230 V 60 Hz

**Possible type of installation** fixed in vertical position. Horizontal installation is possible, it is recommended to install a cooling sleeve

**Certification** pump end NSF61 & NSF 372

4GG & 4TW motor: UL / CSA & NSF 61 & 2372 approved

## CONTROL BOX - USA VERSION

- Version with metal casing.
- PLUS version contains a magnetic line contactor carefully matched to the motor, eliminating the need for an external line contactor.

# CORE - STOCK PRODUCTS

This 2 wire submersible asynchronous two-pole motor. It's made with durable AISI 304 stainless steel, ensuring that the parts in contact with water are protected.

To keep the motor cool and lubricated, a mixture of water and glycol is used for the thrust bearing assembly and carbon bushes. The squirrel-cage rotor is securely mounted on a Kingsbury self-centering thrust bearing. The stator is housed in a sealed stainless steel casing, with both the flanges and shell made from AISI 304L stainless steel.

For easy maintenance, there's a removable cable connector. The cable itself is certified by CSA to UL & NSF standards.

This motor is compatible with a variable frequency drive, allowing for flexible use with frequencies ranging from 30 Hz to 60 Hz. The capacitor is protected inside the motor casing where it is directly connected to the motor windings, eliminating the need for an external control box.

Additionally, thermal protection is included in the motor. Choose the reliable and efficient 4" Asynchronous submersible motor for your water applications.

**Flange** NEMA 4"

**Insulation class** F

**Protection class** IP68

**Cooling flow speed** 1.0 ft/sec @ 95 °F

**Power supply tolerance** + 6 % / -10 %

**Max. starts** 20/h

**Max operating depth** 984 ft

**Motor Sizes** 0.5 HP - 1.5 HP

**Motor maximum diameter** 3.9"

**Certification**

Approved to NSF61, 372, UL and CSA standards

# TW

# 99

This 3 wire submersible asynchronous two-pole motor. It's made of AISI 304 stainless steel to ensure durability for the components that come into contact with water. To keep the thrust bearing assembly and carbon brushes cool and lubricated, a mixture of water and glycol is used. The squirrel-cage rotor is securely mounted on a Kingsbury self-centering thrust bearing. The stator is housed in a sealed stainless steel casing, known as a canned-type casing, with both the flanges and shell made from AISI 304L stainless steel.

For easy maintenance, there's a removable cable connector provided. The cable itself is certified to NSF, UL, and CSA standards, ensuring its quality. This motor is designed to be used with a variable frequency drive, allowing for flexible operation with frequencies ranging from 30 Hz to 50/60 Hz. In the single-phase version with a power range of 1.5 to 5 Hp, the capacitor and manually resettable overload protection are located in the Control Box, which can be supplied separately. In the single-phase version with a power range of 0.5 to 1.0 Hp, the thermal protection is already included in the motor itself, but it still requires the Control Box with the capacitor for correct operation.

For the three-phase version, the user must provide their own overload protection.

**Flange** NEMA 4"

**Insulation class** F

**Degree of protection** IP68

**Cooling flow** 1.0 ft/sec @ 95 °F

**Voltage tolerance** + 6% / - 10%

**Max starts** 20/h

**Max operating depth** 984 ft

**Motor Sizes** 0.5 HP - 10 HP

**Motor maximum diameter** 3.9"

**Certification**

Approved to NSF61, 372, UL and CSA standards

# CORE - STOCK PRODUCTS

# GF

This GF 6-inch submersible motor is built tough, combining AISI 304 stainless steel and cast iron construction to make it durable and long-lasting. The parts that come into contact with water are coated with a protective paint coating.

To ensure top-notch performance, the thrust bearing assembly and carbon brushes are cooled and lubricated with a mixture of water and glycol.

The squirrel-cage rotor is securely mounted on a Kingsbury self-centering thrust bearing. The 30 to 60HP models come with a heavy-duty thrust bearing for reliable operation even in deep wells.

The stator is housed in a sealed stainless steel casing, known as a canned-type casing, to keep everything airtight.

For easy maintenance, there's a removable cable connector provided, allowing for quick and convenient access. The cable itself meets NSF, UL, and CSA standards, so you can trust its quality. This motor is designed to be used with a variable frequency drive, giving you flexibility with frequencies ranging from 30 Hz to 60 Hz.

You can get this motor in a three-phase version, and you have the choice between DOL or STAR-DELTA starting types.

The user must provide overload protection.

Additionally, you have the option to equip the motor with a PT100 temperature sensor, which adds an extra level of temperature control monitoring.

**Flange** NEMA 6"

## EVOSTA 2

The Evosta 2, made by DAB, is an electronic circulator that's designed to recirculate water in residential heating and air conditioning systems. It uses a wet rotor and advanced technology to adjust its performance based on what the system needs. This not only saves energy but also protects against pressure fluctuations that can cause issues.

The Evosta 2 is a compact and versatile solution that can replace those older three-speed circulators. It combines the durability of mechanical circulators with the advantages of electronic ones. It's easy to set up too, with a sequential button that lets users choose from nine different operating modes. You've got options like proportional pressure, constant pressure, and constant speed.

Now, all models of the Evosta 2 come with a breather plug and allow for manual release of the motor shaft. They've got threaded suction and delivery ports, a technopolymer impeller, and a cast iron body coated with cataphoretic paint. And let's not forget, the motor casing is made of stainless steel for extra durability. The electronics of the Evosta 2 are water-resistant and have an IPX5 protection class, so you know they can handle the job.

### Operating range

0.8 - 15.1 gpm with head up to 18 ft

### Pumped liquid temperature range

from +14 °F to +230 °F

**Working pressure** 145 psi

**Protection class:** IP X5. (NEMA 4X ) Protected against jets of water

**Insulation class** F

**Installation** with horizontal motor axis

### Standard power input

single-phase 1 x 110-127 V~ 60 Hz

**Pumped liquid** clean, free of solids and mineral oils,

non-viscous, chemically neutral, with properties similar to water (glycol max 30%)

**PUMP BODY** Pump body in cast iron with cataphoresis treatment EVOSTA2 SAN version with Stainless Steel

## NOVA 40<sup>th</sup> SUBMERSIBLE PUMPS FOR DRAINAGE

nova M-A

nova M-NA

Submersible pump for drainage also rainwater in residential building service. The Nova series has been redesigned to mark forty years of commercialization, making it even more reliable, resistant and ergonomic. It can also be used for emptying tanks or cisterns. It is suitable for fixed or portable installations and it is available in the automatic version with the integrated float switch or in the manual version without the float. The pump is suitable for draining flooded basements, cellars and garages or to prevent flooding when installed in rainwater collection wells, and can be used as a portable pump in emergency situations to drain water from flooded premises. A 90° fitting is provided for vertical delivery. The pump body, the impeller and the suction grid are in technopolymer, the motor shaft in stainless steel. Thermal protection incorporated in all single-phase versions. It can work in dry run for up to 1 minute. 0.4" free passage. In compliance with CSA Standards C22.2 No.108 - 14, UL Standard No. 778.

**Flow rate minimum and maximum**  
from 4.4 to 70.4 GPM

**Head up to** 33 ft

**Type of pumped liquid**  
drainage water, mostly clean, rainwater

**Free passage**  
0.2 in or 0.4 in depending on the model

**Liquid temperature range**  
from 32°F to +95°F for domestic use  
from 32°F to +122°F other use

**Outlet connection** threaded 1" 1/4

**Impeller material** technopolymer

**Class of protection** IP 68

**Motor insulation class** F

**Dry run time** 1 minute

**Possible type of installation**  
fixed or portable in vertical position

## NOVA UP SUBMERSIBLE PUMPS

nova up M-A

nova up M-NA

Vertical flow drainage pump in an automatic or manual version with removable filter for suction down to 0.1inch, features that make it a strong pump and allow for installation versatility.

These pumps can be used with liquids that contain solids of a maximum size up to 0.4 in.

Pump body, impeller, Cap and grille in technopolymer.

The motor, rotor shaft and screws in stainless steel.

Triple O-ring seal with interposed oil Chamber.

Asynchronous submersible motor for continuous operation. Stator in a sealed stainless steel enclosure.

Rotor mounted on ball bearings greased for life and oversized. Thermal protection incorporated and CAPACITOR permanently connected.

In compliance with CSA Standards C22.2 No.108 - 14, UL Standard No. 778.

**Operating range**  
from 4.4 to 66 GPM with TDH up to 33 ft

**Liquid temperature range**  
from 32°F to +95°F

**Type of pumped liquid**  
grey waters without fibers

**Minimum depth of draft**

NOVA UP-300M - 4.7 in

NOVA UP 300M - 2.4 in

NOVA UP 600M - 6.5 in

NOVA UP 600M - 2.8 in

**Maximum immersion depth** 23 ft

**Installation** vertical, fixed or portable

**Degree of protection** IP 68

**Insulation class** F

## VERTY NOVA INTEGRATED FLOAT SWITCH SUBMERSIBLE PUMPS

Submersible pumps specifically designed for uses in narrow pits with dimensions down to 7.9 in x 7.9 in. Suitable to pump clear water containing particles with maximum diameter up to 0.2 in.

### Pump with built-in float switch

Anti-corrosive and rust-proof materials.  
Integrated float switch.  
Low suction capability: 0.1 in (manual mode).  
Very low priming and STARTING level of the pump: 0.4" - 0.6" in (manual mode).  
Lever for manual or automatic operation.  
Easy access through sliding cover to float switch for cleaning.  
Motor with thermal overload protection.  
Excellent cooling of the motor that enables the pump to operate even when it is partially submerged.  
Supplied with power cable with plug, non return valve and 4-step fitting.  
In compliance with CSA Standards C22.2 No.108 - 14, UL Standard No. 778 starting from June 2021.

### Flow rate minimum and maximum

from 4.4 to 51.8 GPM

### Head up to

29.7 ft

### Liquid temperature range

from 32°F to +95°F

### Pumped liquid

grey water without fibres

### Pump priming limit

0.4" - 0.6" in manual operation

### Max. immersion depth

23 ft

## FEKA 40<sup>th</sup> SUBMERSIBLE PUMPS FOR EFFLUENT

Submersible pumps suitable for draining and lifting effluent wastewater and rainwater in residential building service. The pumps have been redesigned on the occasion of the forty year anniversary, making them even more reliable, resistant and ergonomic.

The impeller in technopolymer allows the passage of solid bodies up to 1 in. The pumps are designed for fixed or mobile installations and are available in automatic versions with integrated float switch or in manual version without float.

The pump body and the inlet grid are in technopolymer, the motor shaft in AISI 431 motor shaft suitable for light salty water.

Robust and reliable, they have a triple ring seal in oil bath and an asynchronous motor with continuous service. Stator inserted in an airtight stainless steel casing and rotor mounted on oversized ball bearings to increase its durability.

Thermal protection incorporated in all single-phase versions. The pumps can run dry for up to 1 minute. New sealed cable gland design and new motors, more compact and efficient. Impeller bolt sealing to prevent corrosion at bolt motor shaft. In compliance with CSA Standards C22.2 No.108 - 14, UL Standard No. 778.

### Flow rate minimum and maximum

from 4.4 to 52.8 GPM

### Head up to

21.2 ft

### Type of pumped liquid

## CLEAR ANSWER

Submersible pumps to circulate water in garden ponds, create water falls and play water features. Designed to work in both horizontal and vertical installations.

Suitable to pump clear water containing particles with maximum diameter up to 1/3".

- Circulating water in Garden ponds
- Water falls
- Fountains
- Water features

In compliance with CSA Standards C22.2 No.108 - 14, UL Standard No. 778.

**Flow rate minimum and maximum**  
from 4.4 to 70 GPM

**Head up to** 34 ft

**Liquid temperature range**  
from 32°F to +95°F

**Type of pumped liquid**  
Pond waters without fibers

## FEKA BVP

Powerful submersible pumps for drainage and emptying duty. Designed for pumping sewage water containing solid particles of no more than 1.5 in in diameter. Anti-corrosion and anti-oxidation materials. Motor with THERMALPROTECTION against overheating. Wear-resistant motor shaft and impeller. Excellent motor cooling to allow pump to run even when only partially submerged. Automatic version equipped with float switch for automatic STARTING and stopping of the pump, and Manual version. Equipped with power cable with plug, and 3-level union, without check valve. In compliance with CSA Standards C22.2 No.108 - 14, UL Standard No. 778.

### Operating range

from 4.4 to 105.7 GPM with head up to 39 ft

### Liquid temperature range

from 32°F to +95°F

### Pumped liquid

Sewage water with maximum solid particle size 1.5 in

**Max. immersion depth** 23 ft

## NOVA 4100

**Submersible pumps specifically designed for the circulation of water in ponds, to create waterfalls and water features.**

Suitable for continuous operation.

### CONSTRUCTION FEATURES OF THE PUMP

Hydro resistant technopolymer pump body, wear-free impellers, cover, and suction grid. Corrosion and oxidation resistant materials.

### CONSTRUCTION FEATURES OF THE MOTOR

Submersible type continuous duty asynchronous motor.

Thermal overload protection.

Wear-resistant motor shaft.

In compliance with CSA Standards C22.2 No.108 - 14, UL Standard No. 778.

### Operating range

from 1.4 to 60 GPM with head up to 31 ft

### Liquid temperature range

from 32°F to +95°F

### Pumped liquid

Pond water with maximum solid particle size 0.4 in

**Max. immersion depth** 22 ft

**Cable length** 100ft
